

Where Do You Want To Be Remembered?

This urn includes a unique alpha-numeric geotag system, which you can use to digitally mark the final resting place of your loved one.

Use this system to mark the exact location (within a few feet) of where the cremated remains/urn are laid to rest. You can then upload a photograph and create a personal online memorial that will be visible on our Memorial Map in the form of a "Pin" that can be viewed by friends and family.

Visit

www.passagesinternational.com/memorial-map
to create your online memorial using the GEO code
provided on the box.

*Geotag locations appear
worldwide, not just
within the United States.

Please follow local regulations before scattering from or burying this urn.
